Match Scores

Continuing the article began last month, I will explain how the scores for IDPA matches are calculated and presented. IDPA scores are recorded as time in seconds. These times are totaled from individual strings or scenarios shot in the match. Added to the times are points down for shots hitting outside the optimum target areas. Each point down adds ½ second to the shooter's time. There are also penalties ranging from 3 seconds up to as high as 20 seconds that are added to the shooter's time for various infractions. A complete description of this scoring procedure can be found in the IDPA rulebook. IDPA emphasizes that shooters are only in competition with other shooters that are in their class and their division. Classes are determined by a shooter's score in a Classification Match they are expected to shoot at least once

per year. This score determines if the shooter is a Novice, Marksman, Sharpshooter, Expert, or Master. The divisions include Stock Service Pistol, Enhanced Service Pistol, Custom Defensive Pistol, Stock Service Revolver, and Enhanced Service Revolver. Therefore an IDPA match would have scores in 30 different classes/divisions, which is fine for a match with 100 to 200 shooters. Since our club matches usually have 10 to 20 shooters, I have chosen to record the shooters from fastest time down to slowest time without regard to division or classification. I have purposely not indicated "first place", "second place", etc. since the shooters may not, and probably are not, shooting in the same class and/or division.

New Targets

At the next IDPA match we will be shooting at some new targets.....and they will be

dodging our shots....sort of. The club is the proud owner of 3 new targets that MOVE. Through the efforts of Doug Schultheis who found the plans on the internet, Jeff Hanger who cut and welded the steel, and your match fees that paid for everything we shall have some new challenges that swing, wobble, and turn towards you and away. We hope to use these for other matches as well.
